

To begin:

- 1) Go to [www.LifebuilderCC.org](http://www.LifebuilderCC.org), visit our Multimedia section, and right-click on the MP3 link of the sermon you wish to download.
- 2) Choose "Save Link As..." or "Save Target As..." (depending on your web browser)
- 3) Choose to save the MP3 file to your desktop.

When you are ready to burn or record MP3 music files as audio tracks on a blank recordable CD to make an audio CD, follow this tutorial:

1. Start Windows Media Player.
2. Click the Burn tab. You may get a blank burn list.
3. Use the drop down list above the burn list window to select the MP3 must album you have created: Herong First Album. Windows Media Player will populate the burn list with all music files from this album:

4. Look at the burn list. Each music is selected to be burned to the audio CD with a status of "Ready to burn". The summary is reported below the burn list: "10 Item(s), Total Time: 48 Minutes".
5. Double check to make sure you have a blank CD in the CD drive. The write speed should be 4X ensure best burning quantity.
6. Windows Media Player starts a two-step to finish burning the CD. First it converts all MP3 files to audio tracks according to the CD-DA specifications in memory. Then it burns all audio tracks to the CD. The whole process took about less than 10 minutes.
